AMERICAN

CHEMICAL JOURNAL

EDITED BY

IRA REMSEN

PROFESSOR OF CHEMISTRY IN THE JOHNS HOPKINS UNIVERSITY.

VOL. XIX. 1897.

BALTIMORE: THE EDITOR.

CHEMICAL PUBLISHING CO., PRINTERS,
EASTON, PA.

CONTENTS VOL. XIX.

No. 1.

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF HARVARD COLLEGE:

XCVI. *On Parabromdimetanitrotoluol and Some of its Derivatives.* By C. Loring Jackson and Martin H. Ittner, . 1

ALUMINUM ETHYLATE. By H. W. Hillyer and O. E. Crooker, . 37

ON THE CONDITIONS AFFECTING THE VOLUMETRIC DETERMINATION OF STARCH BY MEANS OF A SOLUTION OF IODINE. By Fannie T. Littleton, ... 44

CONTRIBUTION FROM THE CHEMICAL LABORATORY OF DARTMOUTH COLLEGE:

Silver Hydride. By Edwin J. Bartlett and William F. Rice, 49

CONTRIBUTION FROM THE LABORATORIES OF THE MASSACHUSETTS INSTITUTE OF TECHNOLOGY:

XV. *On the Volatility of Ferric Chloride.* By Henry P. Talbot, ... 52

CONCERNING PROPERTIES BELONGING TO THE ALCOHOL-SOLUBLE PROTEID OF WHEAT AND OF CERTAIN OTHER CEREAL GRAINS. By G. L. Teller, ... 59

SILICIDE OF CHROMIUM. By G. de Chalmot, ... 69

CONTRIBUTION FROM THE CHEMICAL LABORATORY OF WESLEYAN UNIVERSITY:

Paraisobutylphenoxyacetic Acid. By W. P. Bradley and F. Kniffen, ... 70

CONTRIBUTION FROM THE SHEFFIELD LABORATORY OF YALE UNIVERSITY:

XLVII. *On a Simple Automatic Sprengel Pump.* By B. B. Boltwood, ... 76

REVIEWS.

The Practical Methods of Organic Chemistry, ... 79

Notes on Qualitative Analysis, ... 79

Chemistry for Beginners, ... 80

Manual of Determinative Mineralogy, ... 81

Chemistry in Dairy Life, ... 81

Handbook for the Bio-Chemical Laboratory, ... 82

No. 2.

A Contribution to the Study of Water Solutions of Some of the Alums. By Harry C. Jones and E. Mackay, . . . 83
Silicides of Copper and Iron. By G. de Chalmot, . . . 118
Contributions from the Laboratories of the Massachusetts Institute of Technology:
XV. *Formation of Diacetylenyl (Butadiine) from Copper Acetylene.* By A. A. Noyes and C. W. Tucker, . . 123
Contribution from the Sheffield Laboratory of Yale University:
XLVIII. *On the Action of Acid Chlorides on the Imido Esters and Isoanilides, and on the Structure of the Silver Salts of the Anilides.* By H. L. Wheeler and P. T. Walden, ... 129
On the Effect of Light on the Displacement of Bromine and Iodine from Organic Bromides and Iodides. By J. H. Kastle and W. A. Beatty, ... 139
The Specific Gravities of Water Solutions of Formic Acid. By George M. Richardson and Pierre Allaire, . . . 149
The Constitution of Benzanilide. By N. Knight, . . . 152

REVIEWS.

Traité de Chimie Organique d'après les Théories Modernes, . . 155
Analytical Chemistry, ... 156
Recherches sur la Congélation des Solutions Aqueuses Étendues . 157
Kurzes Lehrbuch der organischen Chemie, ... 159
Studies in Chemical Dynamics, ... 160
The Chemical Analysis of Iron, ... 161
Gas and Fuel Analysis for Engineers, ... 162

No. 3.

On the Decomposition of Diazo Compounds:
IX. *On the Reaction of Ethyl and Methyl Alcohols with Paradiazometatoluenesulphonic Acid in the Presence of Various Substances.* By John J. Griffin, ... 163
On Metatoluenesulphonic Acid. By John J. Griffin, . . 183
Contributions from the Chemical Laboratory of Harvard College:
XCVII. *On the Colored Compounds Obtained from Sodic Ethylate and Certain Aromatic Nitro Compounds.* By C. Loring Jackson and Martin H. Ittner, ... 199
Contributions from the Sheffield Laboratory of Yale University:
XLIX. *On the Action of Chlorcarbonic Ethyl Ester on Formaniline.* By H. L. Wheeler and H. F. Metcalf, . 217

NOTES OF STUDENT WORK FROM THE LABORATORY OF ANALYTICAL CHEMISTRY, UNIVERSITY OF MICHIGAN. Communicated by F. P. Dunnington :

162. *Drying and Deliquescence of Certain Salts.* By. F. W. Smither, ... 227

163. *Analysis of a Variety of Ilmenite.* By George M. Peek, ... 232

164. *"Mineral Tallow" from Danby, Vt.* By L. E. Smoot, . 233

165. *Analysis of Dolomitic Marble from Texas, Md.* By George G. Buck, ... 234

166. *Analysis of an Alum Water from Lee Co., Va.* By L. E. Smoot, ... 234

167. *Analyses of Infusorial Earth.* By F. W. Smither, . 235

THE PROTEOSE OF WHEAT. By Thomas B. Osborne, . . . 236

REVIEWS.

An Introductory Course of Quantitative Chemical Analysis, with Explanatory Notes and Stoichiometrical Problems, . . 237

A Simple Method of Water Analysis, Especially Designed for the Use of Medical Officers of Health, ... 238

The Gases of the Atmosphere, ... 239

A Manual of Quantitative Chemical Analysis for the Use of Students, ... 240

Obituary Note, ... 242

No. 4.

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF THE CASE SCHOOL OF APPLIED SCIENCE:

XXIII. *On the Butanes and Octanes in American Petroleum.* By Charles F. Mabery and Edward J. Hudson, . 243

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF CORNELL UNIVERSITY:

Naphthalene Tetrabromide, $C_{10}H_8Br_4$. By W. R. Orndorff and C. B. Moyer, ... 262

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF HARVARD COLLEGE:

XCVIII. *On Hydrocobaltocobalticyanic Acid and Its Salts.* By C. Loring Jackson and A. M. Comey, ... 271

ON THE ANALOGIES IN COMPOSITION OF THE SALTS OF CALCIUM, STRONTIUM, AND BARIUM. By J. H. Kastle, ... 281

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF THE UNIVERSITY OF ILLINOIS:

Action of Mercaptides on Quinones. By H. S. Grindley and J. L. Sammis, ... 290

CONTRIBUTION FROM THE KENT CHEMICAL LABORATORY OF THE UNIVERSITY OF CHICAGO:

The Action of Sodium Ethylate on Amide Bromides. By S. E. Swartz, ... 295

THE HYDROLYSIS OF ACID AMIDES. By Ira Remsen, . . . 319

REVIEWS.

Lehrbuch der algemeinen Chemie, ... 322

No. 5.

CONTRIBUTION FROM THE KENT CHEMICAL LABORATORY OF THE UNIVERSITY OF CHICAGO:

On Urethanes. By Otto Folin, ... 323

ACTION OF PHOSPHORUS PENTACHLORIDE ON ANILINE AND ITS SALTS. By J. Elliott Gilpin, ... 352

CONTRIBUTIONS FROM THE SHEFFIELD LABORATORY OF YALE UNIVERSITY:

L. *On the Preparation of Metabrombenzoic Acid and of Metabromnitrobenzene.* By H. L. Wheeler and B. W. McFarland, ... 363

LI. *On the Non-Existence of Four Methenylphenylparatolylamidines.* By H. L. Wheeler, ... 367

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF CASE SCHOOL OF APPLIED SCIENCE:

XXV. *Investigations on American Petroleum. On the Composition of a South American Petroleum.* By Charles F. Mabery and Arthur S. Kittelberger, ... 374

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF THE LEHIGH UNIVERSITY:

IV. *The Action of Certain Alcohols on Asym-Metadiazoxylenesulphonic Acid.* By W. B. Shober and H. E. Kiefer, . 381

THE ACTION OF ETHYLIC OXALATE ON CAMPHOR. (II). By J. Bishop Tingle, ... 393

CONTRIBUTION FROM THE LABORATORY OF GENERAL CHEMISTRY, UNIVERSITY OF MICHIGAN:

The Preparation of Zinc Ethyl. By Arthur Lachman, . 410

A SIMPLE TEST FOR THE HALOGENS IN ORGANIC HALIDES. By J. H. Kastle and W. A. Beatty, ... 412

REVIEWS.

Commercial Organic Analysis, ... 414

Engineering Chemistry, ... 415

Ptomaïns, Leucomaïns, Toxins and Antitoxins, ... 416

A Laboratory Manual of Inorganic Chemistry, ... 417

Laboratory Calculations and Specific Gravity Tables, . . . 418

No. 6.

CONTRIBUTIONS FROM THE CHEMICAL LABORATORY OF THE CASE SCHOOL OF APPLIED SCIENCE:

XXVI. *The Constituents of Pennsylvania, Ohio and Canadian Petroleum between 150° and 220°.* By Charles F. Mabery, ... 419

XXVII. *Refractive Power of the Hydrocarbons and Chlorine Derivatives Described in a Preceding Paper.* By Charles F. Mabery and Edward J. Hudson, . . . 482

CONTRIBUTIONS FROM THE SHEFFIELD LABORATORY OF YALE UNIVERSITY:

LII. *On the Molecular Rearrangement of the Oximes by Means of Certain Metallic Salts.* By William J. Comstock, ... 485

THE ACTION OF UREA AND PRIMARY AMINES ON MALEIC ANHYDRIDE. By Frederick L. Dunlap and Isaac Phelps, . . 492

ON THE ISOMERIC CHLORIDES OF *p*-NITRO-*o*-SULPHOBENZOIC ACID. By Ira Remsen and G. W. Gray, ... 496

A STUDY OF FERRIC HYDROXIDE IN PRECIPITATION. By Vernon J. Hall, ... 512

REVIEWS.

Index 919

INDEX VOL. XIX.

ACETOPHENONE, action of sodium upon methylpropylketone and, (Freer and Lachman) 878
See "Methylpropylketone."

Acetylbenzenesulphanilide, (Wheeler, Smith, and Warren) 760
Crystallographic study.
See "Anilides."

Acetylene diiodide, (de Chalmot) 877

Acid amides, the hydrolysis of, (Remsen) 319
Conditions governing reactions.

Acid chlorides, action of, on the imido esters and isoanilides, and on the structure of the silver salts of the anilides, (Wheeler and Walden) 129
Action on the isoanilides and imido ester; action of halogen on imido esters.

Acetylimidoethyl benzoate, (Wheeler and Walden) 137
Preparation from benzimidoethyl ester; properties.
See "Acid chlorides."

Acetylimidomethyl benzoate, (Wheeler and Walden) 137
Preparation from benzimidomethyl ester; properties.
See "Acid chlorides."

Agricultural Analysis, the Principles and Practice of, Vols. II and III, Fertilizers and Agricultural Products, H. W. Wiley. (Review) 528

Allaire, P. See *Richardson, G. M.*

Allen, E. T. See *Hill, H. B.*

Allgemeinen Chemie, Lehrbuch der, W. Ostwald. (Review) 322

Aluminium alcoholates, (Hillyer) 597
Formation of aluminium methylate, 599; of aluminium propylate, 601; of aluminium isopropylate, 602.

Aluminium carbonate, (Day) 707
See "Sodium aluminate."

Aluminium ethylate, (Hillyer and Crooker) 37
Formation from action of aluminium amalgam on alcohol; of stannic chloride and aluminium on alcohol; properties.

Alums, water solutions of some of the, a contribution to the study of, (Jones and Mackay) 83
Methods of diffusion, thermal changes, volume changes, solubility of salt mixtures, electrolysis, electrical conductivity, lowering of the freezing-point; titration of aluminium; conductivity results; freezing-point measurements.

Alum water from Virginia, analysis of, (Smoot) 234

Amide bromides, action of sodium ethylate on (Swartz) 295
Action of sodium methylate on succinimide bromide; of sodium ethylate on benzamide bromide, on *o*-, *m*- and *p*-nitrobenzamide bromide and on succinimide bromide, 295; action of phosphorus pentachloride on urethanes, 310; action of alcohols, aniline and ammonia on isocyanates, 313; action of dialkylated amines on isocyanates, 316.

Ammonia in water, solubility of, at temperatures below 0° C., (Mallet) 804
Methods of work and curve representing results.

Ammonia, solubility of lead in, (Endemann) 890

Amyl-*o*-nitrophenylcarbamate, (Swartz) 314
Preparation from *o*-nitrophenyl isocyanate; melting-point.
See "Amide bromides."

Analytical Chemistry, N. Menschutkin. (Review) 156

Anethol and its isomers, (Orndorff, Terrasse, and Morton) 845
Résumé, 845; method of preparation, molecular weight, and properties of the following isomers: anethol, 851; estragol, 853; fluid metanethol, 854; anisoin, 856; solid metanethol, 858; isoanethol, 860; photoanethol, 861; action of heat on anethol, 862.

Anhydrophenyltaurine, (Kohler) 746
Preparation and properties.
See "Sulphonic acids."

Anhydrotaurine, (Kohler) 744
Preparation and properties.
See "Sulphonic acid."

Anilides, diacyl, (Wheeler, Smith, and Warren) 757
Crystallographic study of the following salts: formylbenzenesulphanilide, 759; acetylbenzenesulphanilide, 760; propyonylbenzenesulphanilide, 761; benzoylbenzenesulphanilide, 763; benzenesulph-*a*-napthalide, 764; benzoylbenzenesulph-*a*-naphthalide, 764; benzenesulph-β-naphthalide, 765; benzoylbenzenesulph-β-naphthalide, 765; formanilide, 765.

Anilides, halogen addition-products of the, (Wheeler, Barnes, and Pratt) 672
Ammonium triiodide, 675; compounds of acetanilide, *p*-bromacetanilide, methyl-*m*-nitroacetanilide and formanilide with single and mixed halogens, 676.

Anilides, structure of the silver salts of the, (Wheeler and Walden) 129
See "Acid chlorides."

Anilidodinitrobenzoic acid, (Jackson and Ittner) 18
Preparation and properties; melting-point; Na-, Ag-, Cu-, Fe-, Ni-, Cd- and Mg-salts; formation of ester; action of nitrous acid.
See "*p*-Bromdimetanitrotoluol."

Anilidoethanesulphon anilide, (Kohler) 747
Preparation and properties.
See "Sulphonic acids."

Aniline and its salts, action of phosphorus pentachloride on, (Gilpin) 352
Action of phosphorus pentachloride on aniline hydrochloride and formation of trichlorphosphanil, 354; decomposition with water and sulphuric acid, 354; action of phosphorus pentachloride on aniline and formation of chlorphostetranilide; decomposition with sulphuric acid; salts of sulphonic acid, 357; action of phosphorus pentachloride on the toluidines, 363.

Anisoin, (Orndorff, Terrasse, and Morton) 850, 856
Preparation, molecular weight and properties.
See "Anethol."

Assaying, notes on, P. deP. Ricketts. (Review) 913

Atomic weights, a recalculation of the, F. W. Clarke. (Review) 525

BARTLETT, E. J., and RICE, W. J. Silver hydride 49

Barnes, B. See *Wheeler, H. L.*

Baumann, Eugen, I. Remsen. (Obituary notice) 242

Beatty, W. A. See *Kastle, J. H.*

Benzanilide, the constitution of, (Knight) 152
Action of benzenesulphanilide on benzoylchloride; formation of dibenzoylanilide.

Benzenesulph-*a*-naphthalide, (Wheeler, Smith, and Warren) 764
Crystallographic study.
See "Anilides."

Benzenesulph-β-naphthalide, (Wheeler, Smith, and Warren) 765
Crystallographic study.
See "Anilides."

Benzoylbenzenesulphanilide, (Wheeler, Smith, and Warren) 763
Crystallographic study.
See "Anilides."

Benzoylbenzenesulph-β-naphthalide, (Wheeler, Smith, and Warren) 765
Crystallographic study.
See "Anilides."

Benzoylimidoethyl benzoate, (Weeeler and Walden) 136
Preparation and properties.
See "Acid chlorides."
Bio-chemical laboratory, Handbook for the, J. A. Mandel. (Review) 82
Boiling-point apparatus for use with low- and with high-boiling solvents, (Jones) 581
Description of apparatus and method of work, 581; results with ether, alcohol, benzene, anisol and aniline as solvents, 590.
Boltwood, B. B. On a simple form of Sprengel pump 76
Bradley, W. P. and *Kniffen, F.* Paraisobutylphenoxyacetic acid 70
***m*-Brombenzbromamide, (Folin)** 328
Preparation from *m*-brombenzamide; melting-point.
See "Urethanes."
***m*-Brombenzoic acid and of *m*-bromnitrobenzene, preparation of, (Wheeler and McFarland)** 363
Preparation from benzoic acid; formation of perbrombenzene in sealed tube, 363; preparation of *m*-bromnitrobenzene from nitrobenzene, 368; preparation of 1,4-dichlor-2,5-dibrombenzene from paradichlorbenzene, 366.
***p*-Bromdimetanitrobenzoic acid, (Jackson and Ittner)** 12
Preparation and properties; reactions; Na-, Ag-, Fe-, Pb- and Cu-salts; formation of ethers; action of aniline and *m*-phenylenediamine, 12; action of pyridine, 30; action of hydrochloric acid, 36.
See "*p*-Broundi-*m*-nitrotoluol."
***p*-Bromdimetanitrotoluol, (Jackson and Ittner)** 1
Preparation and properties; action of aniline on; formation of nitroso compounds (properties) and esters; oxidation to acid; salts of acid.
Bromimidomethyl benzoate, (Wheeler and Walden) 138
Preparation and properties.
See "Acid chlorides."
Bromine, displacement of, from bromides by action of light, (Kastle and Beatty) 139
See "Light."
Brommaleic and chlormaleic acid-anhydrides, certain derivatives of, (Hill and Allen) 650
Formation of brommaleïc acid-aldoxime from pyromucic acid (properties); Ba-, Pb-, and Ag-salts; methyl ester; anhydride, 650; formation of mucochloroxime anhydride from mucochloric acid (properties, melting-point), 657; formation of brommaleïnimide, 658; formation of chlorbromsuccinic, dibromsuccinic, and tribromsuccinic acid-aldoximes as addition-products of brommaleïc acid-aldoximes (properties, melting-point), 659; formation of dibromacroleïnoxime from tribromsuccinic acid-aldoxime (properties); preparation of dibromacroleïn (properties, melting-point), 662; preparation of chlormaleïc acid-aldoxime from pyromucic acid (properties); anhydride and ester; formation of ester of dichlorsuccinic acid-aldoxime, 665.
Brommaleïc acid-aldoxime, (Hill and Allen) 650
Preparation from pyromucic acid; Ba-, Pb-, and Ag-salts; ester; anhydride.
See "Brommaleïc acid-anhydride."
Brommaleinimide, (Hill and Allen) 658
Preparation from oxime of mucobromic acid; properties.
See "Brommaleïc acid-anhydrides."
***m*-Bromnitrobenzene, (Wheeler and McFarland)** 366
Preparation from nitrobenzene.
See "*m*-Brombenzoic acid."

m-Bromphenylurea, (Folin) 340
Preparation from *m*-bromphenylurea chloride; properties and melting-point.
See "Urethanes."
Bromsuccinic acid-aldoxime, (Hill and Allen) 659
Preparation from brommaleïc acid-aldoxime; properties; esters.
See "Brommaleïc acid-anhydride."
Bromwell, W. A study of the action of methyl alcohol on the sulphate of *o*-diazotoluene 561
Buck, G. G. See *Dunnington, F. P.*
Burwell, A. W. See *Worstall, R. A.*
Butadiine, (Noyes and Tucker) 123
See "Diacetylenyl."
Butanes and octanes in American petroleum, (Mabery and Hudson) 243
See "Petroleum."
n-Butyrylbenzenesulphanilide, (Wheeler, Smith, and Warren) 763
Crystallographic study.
See "Anilides."

CALCIUM, strontium, and barium, analogies in the composition of the salts of, (Kastle) 281
California petroleum, (Mabery) 796
See "Petroleum."
Camphor, action of ethylic oxalate on, (Tingle) 393
Preparation of ethylic camphoroxalate under different conditions, 397; preparation of phenylhydrazide of ethylic camphoroxalate, 402; preparation of ethylic camphylphenylpyrazolcarboxalate from the hydrazide, and oxidation to the acid, 403; preparation and properties of camphoroxalic acid and action with hydroxylamine, 406; formation of camphyl isoxazole, 409.
Camphoroxalic acid, (Tingle) 406
Preparation from ethylic camphoroxalate; properties; action with hydroxylamine.
See "Camphor."
Camphylisoxazole, (Tingle) 409
Preparation, properties, and melting-point.
See "Camphor."
Camphylphenylpyrazolcarboxylic acid, (Tingle) 405
Preparation from ethylic camphylphenylpyrazolcarboxalate; properties and melting-point.
See "Camphor."
Carbohydrates, a résumé of progress in the chemistry of the, during 1896. W. E. Stone (Report) 608
Carbomethoxy-β-amidopropionbromamide, (Folin) 335
Preparation from carbomethoxy-β-amidopropionamide; properties and melting-point; action of sodium methylate.
See "Urethanes."
Carbonyldiurethane, (Folin) 349
Preparation from urethane; properties; Ag-salt.
See "Urethanes."
de Chalmot, G. Acetylene diiodide 877
" Action of sulphur on silicides 871
" Silicide of chromium 69
" Silicides of copper and iron 118
Chamberlain, W. E. A study of the action of the nitrate and sulphate of *p*-diazotoluene on methyl alcohol under various conditions 531
Chavicol, methyl ether of, (Orndorff, Terrasse, and Morton) 848
Method of preparation.
See "Anethol."

Diacetylenyl (Butadiine) from copper acetylene, formation of, (Noyes, A. A. and Tucker) 123
Conditions governing formation; properties and compound with bromine.

Diacyl anilides, (Wheeler, Smith, and Warren) 757
See "Anilides."

Diamyl-*o*-nitrophenylurea, (Swartz) 317
Preparation from *o*-nitrophenyl isocyanate.
See "Amide bromides."

Diazobenzoic acids, the salts of, (Weida) 552
Preparation from amido acids and decomposition with alcohol with formation of ethereal salts of methoxy acids.
See "Nitrodiazobenzenes."

Diazo compounds, decomposition of 163, 531

***o*-Diazotoluene, action of methyl alcohol on the sulphate of, (Bromwell)** 561
Preparation of *o*-diazotoluene from *o*-toluidine nitrate, 561; preparation of sulphate and formation of *o*-methoxytoluene by decomposition with methyl alcohol at different temperatures, 563; properties of *o*-methoxytoluene and treatment with sulphuric acid, 567; preparation of *o*-methoxytoluenesulphonic acid, the Ca-, Mg-, Zn-, Cu-, Pb-, Na-, and K-salts, chloride and amide, 569; formation of *o*-methoxysulphaminebenzoic and dihydroxybenzoic acids, 574; oxidation of *o*-methoxytoluene, 577.

***p*-Diazotoluene, action of nitrate and sulphate of, on methyl alcohol under various conditions, (Chamberlain)** 531
Formation of *p*-methoxytoluene under different conditions of pressure, 531; formation of toluene from decomposition with sodium methylate, methyl alcohol and caustic potash, alcohol and potassium carbonate, and alcohol and zinc dust, 541; formation of methoxytoluene and toluene from decomposition with alcohol and zinc oxide, 544; action of nitric acid on *p*-methoxytoluene, 534.

***p*-Diazo-*m*-toluenesulphonic acid, reaction of ethyl and methyl alcohols with, (Griffin)** 163
Decomposition with methyl alcohol in the presence of sodium methylate, sodium carbonate, sodium hydroxide, zinc dust, and calcium carbonate, 163; decomposition with ethyl alcohol in the presence of sodium ethylate, sodium carbonate, sodium hydroxide, zinc dust, and ammonia, 169; preparation of *m*-toluenesulphonamide; oxidation to acid; Ba- and Ag-salts, 176.

(*a*)-*m*-Diazoxylenesulphonic acid, action of alcohols on, (Shober and Kiefer). 381
Preparation of acid from (*a*)-*m*-xylidinesulphonic acid; diazotization of the potassium salt, 381; formation of xylenesulphonamide and methoxyxylenesulphonamide by the action of methyl alcohol on the acid and diazo compound, 383; formation of xylenesulphonamide and ethoxyxylenesulphonamide by the action of ethyl alcohol at various pressures, 384; corresponding results with propyl alcohol, 384; (*a*)-*m*-methoxyxylenesulphonic acid (properties of acid, Ba-, K-, Cu-, Zn-, and Na-salts, amide), 386; (*a*)-propoxyxylenesulphonic acid (properties; Ba-, K-, and Zn-salts; amide), 388; oxidation of (*a*)-*m*-methoxyxylenesulphonamide (Ba-, Ca-, Na-, and K-salts of the acid), 390.

Dibenzoylmethanepropylketone, (Freer and Lachman) 880
See "Methylpropylketone."

Dibromacroleïnoxime, (Hill and Allen) 662
Preparation from tribromsuccinic acid-aldoxime; properties; formation of dibromacroleïn.
See "Brommaleïc acid-aldoxime."

Dibromdiphenylcrotonic acid, (Hill and Dunlap) 646
Preparation from mucobromic acid; ester; Ba-, Ca-, and Ag-salts: decomposition in alkaline solution.
See "Mucochlorylchloride."

Dibutyl-*o*-nitrophenylurea, (Swartz) 317
Preparation from *o*-nitrophenyl isocyanate.
See "Amide bromides."
1,4-Dichlor-2,5-dibrombenzene, (Wheeler and McFarland) 366
Preparation from *p*-dichlorbenzene.
See "*m*-Brombenzoic acid."
Dichlordiphenylcrotonic acid, (Hill and Dunlap) 642
Preparation from mucochloryl chloride; properties and melting-point; Ba- and Ca-salts; oxidation to diphenylacetic acid (properties and melting-point); reduction to diphenylbutyric acid (properties and Ag-salt).
See "Mucochlorylchloride."
Diethyl-*o*-nitrophenylurea, (Swartz) 317
Preparation from *o*-nitrophenyl isocyanate.
See "Amide bromides."
Dihydroxybenzoic acid, (Bromwell) 574
Preparation from *o*-methoxysulphaminebenzoic acid.
Properties and melting-point.
See "*o*-Diazotoluene."
p-Dimethylamidobenzonitril, (Folin) 333
Preparation from diazochloride of *p*-amidodimethylaniline.
See "Urethanes."
Dimethyl-*o*-nitrophenylurea, (Swartz) 316
Preparation from *o*-nitrophenyl isocyanate.
See "Amide bromides."
Dinitranisic acid, (Jackson and Ittner) 209
Preparation from oil from anise: melting-point; colored compounds; properties.
See "Sodic ethylate."
Dinitrocarboxylphenylmalonic ester, (Jackson and Ittner) 22
Preparation from bromdinitrobenzoic acid and sodium malonic ester; melting-point and properties; Ag-salt.
See "*p*-Bromdi-*m*-nitrotoluol."
Dinitrotoluidine, (Jackson and Ittner) 5
Preparation from paracettoluid.
See "*p*-Bromdi-*m*-nitrotoluol."
Dipropyl-*o*-nitrophenylurea, (Swartz) 317
Preparation from *o*-nitrophenyl isocyanate.
See "Amide bromides."
Dissociation of electrolytes as measured by the boiling-point method, (Jones and King) 753

See "Mucophenoxychloric acid."

Mucophenoxychloric and mucophenoxybromic acids, on the oximes of, (Hill and Widtsoe) 627
Preparation of mucophenoxybromic acid; Ag-salt and methyl ether of mucophenoxybromoxime (properties and melting-point), 631; preparation of methyl mucophenoxybromate, 632; preparation of esters of mucophenoxybromoxime (properties and melting-point), 633; preparation of mucophenoxybromoxime anhydride from the oxime (properties and melting-point), 634; preparation of phenoxybrommaleïnimide from the oxime, Ag-salt of the imide, 637; mucophenoxychloric acid, 637; preparation of methyl ether of mucophenoxychloroxime from the silver salt of the oxime (properties and melting-point), 637; preparation of methylmucophenoxy chlorate from silver mucophenoxychlorate, 638; preparation of the oxime of the ether from the chlorate, 639; preparation of the anhydride of the oxime (properties and melting-point), 639; preparation of phenoxychlormaleïnimide from the oxime anhydride, 640.

Mucophenoxychloroxime, (Hill and Widtsoe) 637
Preparation of methyl ester and anhydride, 639.
See "Mucophenoxychloric acid."

Murrill, P. See *Kastle, J. H.*

NAPHTHALENE tetrabromide, (Orndorff and Moyer) 262
Preparation, properties, and molecular weight.

β-Naphthylmaleämic acid, (Dunlap and Phelps) 495
Preparation from β-naphthylamine.
See "Maleic anhydride."

p-Nitrocarbanilide, (Swartz) 319
Preparation from *p*-nitrophenyl isocyanate.
See "Amide bromides."

Nitro compounds, compound obtained from sodic ethylate and certain aromatic, (Jackson and Ittner) 199
See "Sodic ethylate."

p-Nitrocyanbenzenesulphonic acid, (Remsen and Gray) 509
Preparation from silver salt; chloride and anilide; Ag-, K-, Ba-, Ca-, Mg-, and Zn-salts.
See "*p*-Nitro-*o*-sulphobenzoic acid."

Nitrodiazobenzene salts, (Weida) 547
Preparation; decomposition with methyl alcohol with formation of nitrobenzene and nitranisol.
See "Nitrodiazobenzenes."

Nitrodiazobenzenes and the diazobenzoic acids with methyl alcohol, the reaction of salts of the, (Weida) 547
Preparation of *o*-nitraniline and its diazo compound and formation of nitrobenzene from decomposition of latter with methyl alcohol, 547; formation of nitrobenzene and nitranisol from decomposition of *m*- and *p*-nitraniline with methyl alcohol, 549; preparation of salts of diazobenzoic acids from corresponding amido acids and formation of ethereal salts of methoxy acids as principal products from decomposition with methyl alcohol, 552.

***m*-Nitrophenyl isocyanate, (Folin)** 338
Preparation from *m*-nitrophenylurea chloride; melting-point and properties.
See "Urethanes."

***p*-Nitrophenyl isocyanate, (Swartz)** 318
Preparation from chloroform-*p*-nitranilide; melting-point and properties.
See "Amide bromides."

***m*-Nitrophenyl-*m*-nitrobenzoylurea, (Folin)** 339
Preparation from *m*-nitrophenyl isocyanate and *m*-nitrobenzamide.
See "Urethanes."

***o*-Nitrophenyl-*o*-toluylurea, (Swartz)** 316
Preparation from *o*-nitrophenyl isocyanate.
See "Amide bromides."

***m*-Nitrophenylurea, (Folin)** 338
Preparation from chloride; properties.
See "Urethanes."

***o*-Nitrophenylurea, (Swartz)** 316
Preparation from *o*-nitrophenyl isocyanate.
See "Amide bromides."

***o*-Nitrophenylurethane, (Swartz)** 312
Preparation from methyl *o*-nitrophenylurethane; action of alcohols, aniline, toluidine and ammonia.
See "Amide bromides."

Nitrosoanilidodinitrotoluol, (Jackson and Ittner) 11
Preparation from anilidodinitrotoluol.
See "*p*-Bromdi-*m*-nitrotoluol.

***p*-Nitro-*o*-sulphobenzoic acid, isomeric chlorides of, (Remsen and Gray)** 496
Formation of chlorides by action of phosphorus pentachloride on the acid potassium salt of *p*-nitro-*o*-sulphobenzoic acid, and method of separation; formation of acid and sulphinide by action of water and ammonia, 497; Ag-, K-, Ba-, Ca-, Mg-, and Zn-salts; *p*-nitrocyanbenzenesulphonic acid and sulphinide, 508; chloride and anilide of the latter, 509.
